

wapipely.com

Wapipely is a site that is focused to showing potential employers the portfolios of people looking for jobs in their employer's field of work.

Wapipely provides users with the means to directly upload their portfolio onto the site easily and quickly. Once the user's portfolio is uploaded to the site, it will be able to be viewed by employers on the site who are looking for people to employ. The employers will be able to filter them by skillset and work experience in order to find the best fit for their company needs. Our goal with wapipely is to make potential employees connect with employers as quickly and efficiently as possible, resulting in a great fit for both parties.
